

STARKIST SAMOA COLDSTORE PROJECT

Robt. Stone was contracted to design, supply materials, erect and commission a coldstore (freezer) for tuna fish in Satala, Pago Pago, American Samoa. The coldstore has capacity for 3,000 tonnes of tuna or 2,800 fish scows.

Design was undertaken by Peter Swan Ltd. Polystyrene wall and roof panels were supplied by James Hardie Building Systems and erected by Samoan labour under the guidance of a James Hardie Supervisor. The steel frame was fabricated by Robt. Stone New Plymouth workshop and completely hot-dip galvanized against corrosion from the marine environment.
