

REFURBISH 10T X 25M GANTRY CRANE

Robt Stone was contracted by Stress Crete Concrete a Division of Fletcher Concrete to dismantle, remove for corrosion and repair, repaint and reinstall their 10 tonne travelling Gantry crane.

Close liaison with the Statutory Inspection Authority was required to identify repair areas and ensure certification of the repairs. Detailed co-ordination with cranning, transport, mechanical repairs and repainting was necessary to minimise disruption to the Stress Crete pre-stressed concrete production facility.
