

## CANTING KEEL FOR OWEN CLARK 60' YACHT

Tenix Robt Stone fabricated a canting keel for a single handed open 60' racing yacht, designed by Owen Clark Design Group.

The keel, made from Bisalloy 80 material, was designed to be hydraulically canted to provide superior performance. The use of computer generated sections, precise cutting & forming and carefully controlled welding was necessary to achieve the very tight dimensional tolerances and specification requirements. Following fabrication the keel was fully machined.

The yacht was built by Southern Ocean Marine for Graeme Dalton, who was the only New Zealand entry in the single handed around the world race "Around Alone".

- **PROJECT:** CANTING KEEL FOR OWEN CLARK OPEN 60'
- **CLIENT:** SOUTHERN OCEAN MARINE
- **LOCATION:** TAURANGA
- **DATE:** 2002
- **CONTRACT VALUE:** \$ 84,000
