

KAHILI PROCESS SKID

Robt. Stone was engaged by Transfield Worley Ltd to design, fabricate and install on site at Austral Pacific Ltd Kahili Production Station a complete process skid separator package. The skid included, a inlet separator F-7001, a vertical low temperature separator F-7002, and a gas to gas shell & tube heat exchanger E-7021. Provision was also made to add at a later date, a gas chillier E-7025. Design of the separators and heat exchangers was performed by subcontractor Independent Technology Ltd.
