

PIPE LAYING BOOMS

This project involved the conversion of second hand D60 Komatsu and D65 Komatsu bulldozers to pipeline sideboom units. The sidebooms are rated at 6 tonne, one with a 5.6 metre boom and the other with a 6.0 metre boom. They were designed and certified in a joint project with Independent Technology Ltd. All the conversion work was carried out in the Tenix Robt Stone workshop in New Plymouth.

- **PROJECT:** CONVERSION OF BULLDOZERS TO SIDEBOOMS
- **CLIENT:** TENIX ROBT STONE
- **LOCATION:** NEW PLYMOUTH
